

FlashCut **Easy** 222 L12

SINGLE, COMPACT AND MOBILE CUTTING SYSTEM

The Model FlashCut Easy 222 L12 is a mobile all-rounder. Ideally suited for small production quantities or individual products. The special feature of this machine is its high flexibility and mobility. This system is designed for use in any production environment. Due to the low height and the small footprint, it fits ready for operation in a container and can be easily transported with a forklift thanks to the special substructure.

HIGH LUMINOSITY PROJECTORS

Thanks to the integrated projection system, leather skins or residual materials can be used perfectly.

Powerful high-luminosity projectors ensure an accurate representation of the contour to be cut on all materials or colors regardless of the environment.

5 or 7 TOOL HEAD

In order to be able to perform every cutting process optimally, the Easy tables have tool heads with 5 or 7 tools for different knife heads, marker pins and 2 or 4 punch pipes. With the powerful suction system, the perforated pipe waste can be easily extracted.

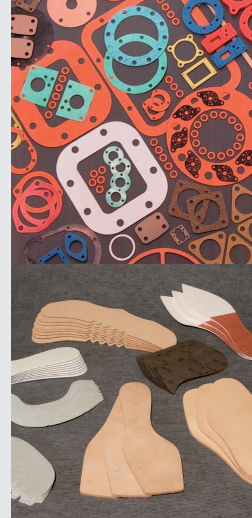

PERFORMANCE AND FLEXIBILITY

Highest quality and excellent cutting speed are the result of a robust, precise design and modern electronics. The reduced height of 2.00 meters makes it possible to transport the machine in a container without having to dismantle parts. They simply pull the plug and can produce directly elsewhere.

OPTIMISED NESTING

Individual systems for automatic nesting (nesting parts) and the user-friendly user interface significantly reduce the time it takes to position the shapes to be cut and optimize material consumption.

APPLICATIONS

The 222 series has not only been developed for prototyping. It is of course also suitable for the production process in a wide range of industries, such as sealing, plastics, packaging, footwear, leather goods, graphic, electrical and converting industries.

TECHNICAL DATA

AVAILABLE MODELS	WORK AREA (mm)	MAX. PERFORMANCE (kW)	DIMENSIONS (WxLxH in mm)	WEIGHT (kg)
FlashCut Easy 222 L12	1200x1000	6,0	2235 x 1760 x 2005	800
